Did you see the moonwalking bear?

What you have just experienced is called Selective Attention. Selective Attention is when you can focus on something even with distracting information. In this case, a moon-walking bear.

You were told to focus on the number of passes the team in white makes and you did a great job of watching the white team. So good, in fact, that you missed a moon-walking bear in the middle of the screen. That's how good you were!

Now you have seen the video. Imagine watching it again. Would it be possible to watch it and not see the bear? No.

For our purposes, the moon-walking bear represents opportunity. Opportunity to make a difference, to see what is special and amazing already in our lives. The opportunity to Be Legendary.
